Bow Valley School Division Settling Up Two Scholarships

The shortage of qualified teachers has caused the board of Bow Valley School Division to set up two scholarships of \$300 each to induce Bow Valley High School graduates to enter the teaching profession. The two scholarships, each \$300, will be offered to high school graduates who meet the qualifications and who will take the Faculty of Education course and guarantee to teach for three years in the Bow Valley Division following completion of their training. Specific rules and regulations regarding the scholarships will be drawn up and published at a later date. This matter was discussed at the last regular meeting of the divisional board.

The 1947 budget was another matter given serious consideration by the board. The board found it necessary to increase the budget somewhat over last year. This was made necessary due to increases in teachers' salaries, in transportation costs, and in the necessity of setting up a building or capital reserve. Every effort, however, was made to keep the various items of expenditure at the lowest possible level consistent with educational efficiency.

The teachers' salary committee met with the board to consider salaries for next year. The committee reported that the board estimate a \$1,400 basic minimum with additional allowances for qualifications and experience. The trustees turned down this proposal and instead offered a salary policy schedule with a minimum of \$1,300 and payments for qualifications and experience. No agreement was reached. Both parties, however, are to consider the matter further at the regular meeting in April when it is expected further information may be available regarding departmental grants for next year.

A new library system is to be inaugurated in the Bow Valley schools. This will be set up along the lines of the Dewey Decimal Library System with modifications for small schools. The chief purpose of the system is to prevent the loss of a number of library and reference books which has normally taken place every year. The system will greatly facilitate frequent and periodic checking of all books in the schools.

Ten amendments were made to the Van Drivers Agreement or "Mileage Form." The board approved an increase in the rate per hour for wages and included an additional clause which allows the driver 3 percent on his total investment. It is expected that all van drivers will shortly call at the secretary's office for completion of the necessary forms.

A special committee was set up by the board to investigate a report on the financial arrangements and educational alternatives with respect to the students attending the Dana school at Stander. Further information will be available at a later date.

The announcement that the British government may take steps to import thousands of foreign workers—perhaps half a million—to ease the present labor shortage may doom to failure any Canadian immigration plan unless our authorities act quickly. Some of the other dominions, Australia especially, and many of the colonies already have schemes in operation, and now it is up to Britain to seek Europeans most of the desirable immigrants will be attracted elsewhere by the time Canada gets started.

The shortage of labor in the United Kingdom is extremely serious. There is far more work to be done than there are men and women to do it. Britain is making efforts in order to balance her economy, but the lack of manpower is preventing her from attaining top production. The fact that labor is so scarce will probably mean that Canada will not be able to draw on the British Isles for immigrants as was originally hoped. Although there are probably a large number of British who would like to come to Canada, the British government will no doubt attempt to discourage them leaving the country.

Canada must have men and women if we are to expand and develop our country to our fullest extent. The need for an immigration plan is urgent if we are to get the right sort of people. The government should not delay any longer.

E. Yellworthy Paces Undefeated Aces

Gleichen Arena was the scene of former hockey days, when the Gleichen High defeated the Strathmore Hockey School 7 to 0, Saturday night, to gain 12 straight wins of the season.

Gleichen's goal tender, McMaster, flashed through for his fourth shutout of the season. Ernie Yellworthy was Gleichen's star of the game, collecting three goals, in the first period and one in the second. L. McMaster tallied once and Service twice.

The last five minutes of the game was a scene of the old Strathmore and Gleichen tradition, when the game ended in a free for all. The local Aces were well supported in their battle by the Blackfoot fans.

Penalties: McKay, Service, Cameron, McMaster.

Gleichen lineup: goal, L. McMaster; defence, L. Liddell, D. Davies, G. Cameron, D. Anderson; forwards, W. McMaster, M. Service, E. Yellworthy, R. Yellworthy, N. Mathison, Joe Barabash, B. McKay. Coach Jack Lester.

The Gleichen team and penalties are not available.

Official, K. Mathison.

Gleichen's next game is scheduled for the weekend when they play at home at the Victoria Arena in Calgary, in a sudden death inter-league playoff game. This is to determine the champs of the North and South School League.

School Board Elect Chairman

Members of the Gleichen School Board met recently for the first meeting of the board this year. R. S. McQueen was appointed chairman. The board consists of the following:

Chairman—R. S. McQueen and trustees R. A. Wilson, R. K. Hunt, E. Elmer Bolinger and E. G. Ferguson.

R. A. Wilson and E. G. Ferguson were appointed a committee to look after the repairs to the school and grounds. The salary schedule for the years 1947 and 1948 came up for discussion, and as sufficient information was not at hand this matter was left over until the next meeting.

CARD OF THANKS

The Gleichen School Board has lost one of its most prominent members, one of those public spirited citizens who are always first in the interests of education of the young people of Gleichen and district and who has done sterling work on their behalf for many years.

Dr. G. H. Farquharson, for the past quarter of a century has served as chairman of Gleichen School Board. His time ran out in February last when he handed over the gavel to the new chairman to carry on the good through many difficult times, not only he had for many years guided as Chairman of the school board meetings, but by going up to the school and seeing that everything was going well. The chairman of the School Board has many responsibilities to attend to, and the chairman and the trustees of the school board wish to express their deep appreciation to Dr. Farquharson for the fine work he has so ably done.

CARD OF THANKS

The members of the Anglican League, R.E.S. of Gleichen, wishes to express their deep appreciation and thanks to all those citizens of Gleichen and district for the magnificent reception which was held in Gleichen recently and the gifts which were presented which we appreciate more than words can tell. These gifts will be of great use for many years and while the day when it was made use of by anyone they wish.

In order to keep Gleichen up-to-date in future it has become necessary that the Community Theatre be open more often to play the current motion pictures. The management is endeavoring to give the public high class entertainment and in order to do this there will be shows on Wednesday and Saturday nights with a matinee on Saturday. The serial will be shown on Saturday. The management ask the public to give their support. This means a different program on each day.

Town Council Hold Meeting

A meeting of the town council was held recently. Dr. Murray was present to see the council regarding a combined hospital in the community with an active doctor to attend every day. He was the town had joined the Rural Municipalities Hospital Board last year it would be necessary to take the matter up with that board before making any decision.

Several by-laws were passed: one regarding the Salway Army 6th, one regarding the sale of property, and one appointing the secretary-treasurer as assessor for the year 1947.

A letter from Walter Wells Limited of Calgary was read. This was in connection with the drilling of a well for the new water works system. The matter was left over until another meeting.

HERE AND THERE

Mr. and Mrs. Jerry Mooney of Irricana spent Sunday in town. The guests of Mr. and Mrs. Ed. Menard.

Bob Haskings, our popular butcher, was informed that George Burns' garage was with a bad attack of the flu.

Mr. and Mrs. R. W. Brown of Calgary spent the week end in town. They came down to attend the house warming given by their son Tom, Saturday evening.

The flu is making its way about the town and district causing many to be confined to their homes. Last Saturday Old Sun School reported there were 54 students and staff ill.

Art Pascoe has purchased the Millie residence and expects to move the wife and family from Calgary some time during the next month.

Last Wednesday afternoon the fire brigade held a fire practice and while they were in the middle of putting out a fire they had kindled and explaining how the new chemical engine worked to all who were interested a real alarm came in. The fire fighters were informed that George Burns' garage was on fire. For a few moments this news was hard to believe. However, the boys got busy and hurried off. Arriving at the garage it was found that the oil stove was not burning right and made huge volumes of smoke which coming out the doors caused nearby residents to conclude the building was on fire.

Raymond Menard of Grand Prairie, Alberta, spent several days in town last week visiting his parents Mr. and Mrs. J. A. Menard. He left Monday morning for his home.

Mrs. G. W. Evans, one of the members of the Welcome Home Committee, has received the following letter from Mrs. Mary Daffoe: "Please convey my thanks to Gleichen's Welcome Home committee for the lovely locket which was given me. I am very sorry that I could not have been there to receive it myself and extend my thanks personally and to tell you how proud I am to have been remembered by my old home town on the occasion of your 'Welcome Home' to your ex-servicé boys and girls."

Meals at any old hour just won't do, declare health authorities. It's not only what but when you eat that counts. It is said that meals should be at convenient and reasonable hours. The digestive tract functions better like other parts of the body if placed on a regular schedule.

In The Legislature

By GEO. E. BELL, M. L. A.

Hon. W. A. Fallow, in taking part in the Debate on the Speech from the Throne, reported that over 4,500 miles of main highways had been maintained last year, and also nearly 3,500 miles of district highways. Last year over 1,500 miles of municipal roads were constructed, and nearly 1,200 miles of gravelled, and nearly government assisted with municipal grants.

371 miles of main highways were constructed last year, and 581 miles of main highways were surfaced with gravel. Nearly 100 miles of road were given the best house treatment.

More than 40 steel bridges were

repaired or built, and over 200 timber bridges. Ten steel bridges are presently under construction four of which are on the Grimsaw highway.

Revenue in this department for 1946 from Vehicle and Highway Traffic Act, Fuel Oil Tax Act, and Highway Traffic Board, was close to \$9,000,000.

In reply to criticism by the C. P. of the Hon. Mr. Fallow gave the following information: from the public accounts of the Province of Saskatchewan.

Last year by an educational tax, they collected more than \$5,500,000; by public revenue tax (which is similar to our past social service tax) they collected \$2,150,000; and by the collection of direct relief extending back from 1930, they collected nearly \$5,500,000. This money collected on direct relief included medical services, feed grain, fodder and grass-hopper and gopher extermination. All of these same debts in Alberta have been cancelled by the Alberta Social Credit government while in Saskatchewan the collection of these debts from the farmers, many of these debts dating back for sixteen years, Saskatchewan paid less for education than was collected by the educational tax, and so took nothing from the rest of their provincial for educational assistance.

"One out of every eight Alberta citizens was x-rayed for T.B. last year," reported Dr. W. W. Brown when talking part in the debate on the speech from the throne. The death rate from this disease had been reduced twenty five per cent since the present government took office.

Last year more than 11,000 patients were checked in the two cancer clinics. Approximately one-half of this number did not have the disease.

Fourteen buildings have been purchased from the Red Deer Army Camp, which will be used to enlarge the facilities at the Red Deer Training School.

When six more municipal hospitals are established in this province, we will have sufficient hospital beds for all our citizens," said the minister.

A Challenge To Agriculture

FOR SOME YEARS NOW Canadian farmers have worked to supply a market which has taken all more than they could produce. Granaries and elevators have been emptied, and supplies of meat and dairy products have often come far short of the demand for them. All this was a great change from the years when large quantities of wheat were held over from season to season, and farmers were on some occasions induced to cut down acreage in order to avoid serious over-production. No one wishes these conditions to return, but there are many who wonder what will happen to the market for Canadian farm products when normal crops are again harvested throughout the world.

Answer Given The answer to this question has been given many times by agricultural experts and nutritional experts both here and abroad. Even in what we consider to be normal times, these experts tell us that a great part of the world's population exists on a diet which is far below the minimum requirements for good health. If people everywhere were adequately fed, standards of health would be higher and this might go far to help in the solution of many of the problems of the present day, for there is no doubt but that lack of food is an important cause of political unrest.

Real Need For Wider Markets Higher nutrition standards throughout the world would mean a steady demand for Canadian farm products and it has frequently been pointed out that Canadians have a real interest in developing wider markets abroad for the food which they produce. It is not a simple matter to cultivate new and wider markets, for we cannot export unless we are also prepared to buy from other lands, which brings up the far-reaching question of increasing buying power in our own country. Dean Grant MacKays of the University of Manitoba, speaking on this subject before a gathering in Winnipeg recently said that if we can stimulate world-wide interest in nutrition there could be no surplus of farm products. "The fact is," he declared, "there are not enough acres in the people's possession to produce properly." He added "The potential markets are there. The challenge to us is to transform them from potential to real markets. And it is going to take a lot of educating to do it." This is a question to which we should be giving much thought and attention at this time.

Canadians Survive Fiery Train Wreck

Coach Al Murray, former N.E.L. player and mentor for Galt's Ontario hockey team, suffered burned hands in the wreck at Fresno, Calif., of the blazing train on which his San Francisco Shamrocks hockey team was travelling.

Here's A Way To Get A House

ADELAIDE, Australia.—A man in Adelaide advertised for a house—and got one. His advertisement read: "I am a bachelor. I only want to have to do, and I don't like gardening. If you must know I want my wife. I have a youngster, too, who will draw nice pictures on your walls, the little pet."

"I got up with them because I love them. I'll go on living with them."

"The question is—where? Your guess is as good as mine, but I'm not particular, as long as we are on our own."

"I'm tired of beating up the in-laws, so if you think your house can stand it, please ring 73284."

Next morning a man rang the number given and said: "Who are you, anyway?"

Given the information, the caller rang off with, "I was curious to know if you were fair dinkum. I think you must be nuts."

Soon after a third rang and said: "I like your sense of humor. Joe, I haven't got a house to offer, but I like your style and I'll do my best to find you one."

The fourth caller offered a new five-roomed house for a man with imagination.

The mid-day meal is as important as a substantial breakfast, and helps make for better returns in work and enjoyment.

CANADA'S COAL RESERVE ENOUGH FOR 27 CENTURIES

OTTAWA.—The royal commission on coal sharply reduced estimates of Canada's coal reserves, but soothed the dismayed with the announcement that there should be enough for everybody for the next 27 centuries.

The report said Canada possesses about 99,000,000 tons of mineable coal or about 40,000,000,000 tons which is recoverable.

The estimate, compiled by Dr. H. R. Mackay of the federal mines department, was based on current level of production.

His total worked out at less than 10 per cent. of the only previous national estimate, one of 1,980,535,000,000 tons made in 1913 which could not be considered an accurate estimate from the standpoint of practical mining.

FUNNY And OTHERWISE

When the prisoner in the dock was asked if he had anything to say before sentence was passed on him, he replied:

"I'm sorry I took the money, my lord; but you know the old saying 'I have a younger man than the more he wants.'"

The judge nodded understandingly. "Well," he said, "you are getting twelve months. How much more do you want?"

"Mabel says she's wildly in love with her new car."

"Just another case of a man being displaced by machinery."

The rejected suitor was making his final plea. "What," he asked, "has this fellow got that I haven't?"

And the girl answered "Well."

For two long hours the members of the town council had been discussing a new means of communication with a neighboring village. Every time a suggestion was made one member or other would find some fault with it.

At last the chairman arose. "Gentlemen," he said, "this quibbling is getting us nowhere. Now I suggest that we put our heads together and build a concrete road."

A stranded English actor went into a hotel stay house in New York for a cheap meal. He was horrified to recognize his waiter as a colleague who had played with him in London.

"Great Scott!" he gasped. "You—a waiter—in this place!"

"Yes," replied the other in dignified scorn, "but I don't eat here."

Called before the elderly officer, the private was being "put through it."

"That's what you say?" snapped the officer sternly. "You break a bottle of beer over the corporal's head and then have the audacity to stand there and say it was an accident?"

"Yes, sir, that's right, sir," replied the private; "I didn't mean to break it."

The landlady was showing the college student his room. "As a whole, this room is quite nice. Don't you think?" she said. "I suppose so," he agreed. "But as a room it's not so good."

The hunter burst into camp and seeing the guide splitting wood, excitedly asks, "Are Harry, John and Albert here?"

"Yep," said the guide, "they're all in the cabin."

"Fine," said the hunter, "then I shot a deer."

More Health-Giving

Nutritional Value of Milk Retained Longer in Colored Bottles

Now it's painted milk bottles. Toronto's Banting laboratories suggests that if a red or green bottle were used instead of the traditional clear-glass container, the milk would retain its nutritional value longer.

Experiments with riboflavin—better known as vitamin B2—led to the painted bottle idea. Nutritional and food investigations by R.C.A.F. doctors and the Toronto Hospital for Sick Children established the fact that the riboflavin essential to good health could best be obtained through milk and dairy products. Also established was the fact that milk exposed to sunlight loses its riboflavin fairly rapidly.

The Banting laboratories idea, then, was not prompted by any desire to bring milk bottles into line with the current trend toward more colorful surroundings. Rather it sprang from investigation indicating that milk in colored bottles would tend to be a more health-giving drink.

MAKES A DIFFERENCE

Speakers are heard better by male listeners than by women, because men's heavy clothing absorbs sound waves instead of reflecting them, as does the light clothing of women.

Senalor Gershaw Writes From Ottawa

Perhaps over the years there is more discussion in farming districts on the price of wheat than any other subject. During World War I, wheat was sold at from two to three dollars a bushel for a time but it later dropped to thirty eight and a half cents at the terminal and thousands were ruined.

During the recent war there were controls on the prices of many articles like wheat, clothing, automobiles, rents, implements, lumber, etc. Many were hurt because they could not get an inflated price for their product. Farm organizations want to know what they can get for their wheat.

EATON'S

when produced and the present agreement with Britain gives stability in price until July 31, 1950. The Board will market all the wheat and the initial price will be \$1.35 per bushel at Fort William, Vancouver or Churchill for a four year period. There will also be participation certificates. This is a guarantee by the government.

The government has made an agreement to take 100 million bushels a year at a price for the crop of 1946-47, \$1.56 per bushel; for 1947-48, \$1.55; for 1948-49, not less than \$1.55 and for 1949-50 not less than \$1.00 per bushel.

At present, of course, world prices are higher than those quoted and there is a clause in the agreement which says that in determining the price for the 1946-49 and 1949-50 crops the U.K. government will have regard for any difference between the prices paid under this agreement in that year and 1947-48 crop years and the world prices for wheat in the 1946-47 and 1947-48 crop years.

The price for the 1948-49 crop will be negotiated before December 31, 1948.

There was a lot of discussion on the bill but it was pretty generally accepted on all sides.

No one can predict what the future may bring but Britain has been our best customer for wheat in the years that have gone by and can be relied upon to keep her side of the agreement. The terms do not favor Britain unduly as some five other countries have been offered negotiations on the same contract and none have followed it up. In Argentina, wheat is being sold on the world market, but the producers only receive one dollar and twenty one and three eighths cents per bushel. The remainder is used for roadwork and other national undertakings. Canada is really the only nation that has guaranteed the producers so high a minimum for so many years.

A. W. GERSHAW,

Red Cross

More than 45,000 articles of clothing were distributed from Canadian Red Cross depots in England in 1946, according to a report for the year received from Mrs. Jean F. Marcus Canadian Red Cross overseas director or civilian relief.

"In some ways there is more hardship in the United Kingdom than there was during the war," Mrs. Marcus said in an introduction to the extensive detailed reports.

This year with its terrible winter is also inflicting hardship on the people of the United Kingdom and the Red Cross is continuing to the limit of its capacity to meet the pressing needs.

Articles given out by the clothing section included quilts, blankets and all types of apparel ranging from clothes for children to clothes for the aged who, according to Mrs. Marcus are suffering many privations.

One reason war brides and their children reached Canada usually well supplied with clothing was that shipments were sent to the vessels and distributed by Red Cross escort officers after sailing. This overcame the coupon difficulty.

In the welfare section a great deal of assistance was given to war brides and their children. During the year, a total of nearly 45,000 women and children left for Canada accompanied by teams of escort officers. For some months, while drafts were leaving aboard the Queen Mary, there were as many as 2,000 women and children to a group. Mrs. Marcus gave praise to the British Red Cross Society and the St. John Ambulance Brigade as well as to Canadian Red

Cross personnel for the competent handling of these gifts.

The Canadian Red Cross is now conducting a national appeal for funds for peacetime work, \$5,000,000 being asked.

It is no credit to the nation that an all time record was established last year in the matter of working time missed due to industrial disputes, stoppages and strikes the total time lost in 1946 is said to be triple that of 1945. The responsibility must be shared by industry and labor, both have been at fault. There is no doubt but what considerable labor strife could have been avoided had the management and union leaders involved adopted a sensible attitude of mediation and arbitration. Estimates

Bolinger, Box 37, Gleichen, Alberta.

state that more than four million man work days were lost to industry in the 205 strikes. It is impossible to figure the financial loss; no one can know all the hardships suffered by the strikers and their families; it is difficult to tell what damage the strikes have done to the economy of the country. Strikes seldom bring any real good

LOOK "Cash In" YOUR EMPTY BEER BOTTLES

The shortage of bottles is acute. In order to maintain the current supply, Brewers of Alberta request your co-operation in returning empties. Don't keep empty bottles around the house. Apart from taking storage space they represent cash to you. If you live in points where Branches are located (see below) phone for a pick-up or deliver them yourself. If you live in points where such branches are not located, ship your empties to the nearest point, "freight collect." Payment will be forwarded to you, promptly. Get out your empties, and turn them into Cash!

FLAX IS A Profitable CROP

PLAN TO GROW FLAX THIS SEASON

World demand and a universal shortage of fats and oils guarantee a steady, profitable market for all the flax you can grow. Flax grown on the Prairies of Western Canada is of highest quality, and brings premium prices. Plan for maximum acreage in flax this year!

Write to the address below for full particulars on how you can make the money growing flax.

VETERANS' Business and Professional LOANS Up to \$3,000

A NEW Dominion Government Act provides that war veterans, resident in Canada and entitled to War Service Grants, may borrow up to \$3,000, on long terms, at reasonable interest rates, for business and professional purposes, as follows:

The purchase of a business or of an interest in a business.

The purchase or repair of instruments, tools, machinery or other equipment to be used in a profession, trade or business.

The construction, repair or alteration of a building used or to be used in carrying on a profession, trade or business.

This Bank is authorized to make these Veterans' Loans, and our Managers will be glad to give helpful advice and assistance to all entitled to such loans.

Veterans may freely consult our Managers—many of them veterans themselves—as to how they can conveniently borrow for business and professional purposes.
